DETAILED ACTION

Response to Amendment/Arguments

1. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

2. Newly submitted claim 6 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The Application as originally filed only set forth claims directed to an apparatus and as such the method claim is being withdrawn since the method can be performed using a different type of mask or the mask as claimed can perform a different method.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 6 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Berthon-Jones et al (US 5,560,354).

5. **As to claim 1**, Berthon-Jones teaches in a face or nose mask for non-invasive ventilation of patients in general, comprising a mask body **40,42** provided with an inlet **50** for connection to a ventilation apparatus and perimetrically provided with a sealing element **44,46** for application to the face of a patient, the improvement in the face or nose mask wherein the sealing element comprises at least one first chamber **44** and at least one second chamber **46**, the at least one first chamber having a first connector **62** connectable to a source of pressurized air, and the at least one second chamber having a second connector **62** connectable to the source of pressurized air, and the second chamber capable of being inflated separately from the first chamber (**See Col. 7, lines 1-23**).

6. **As to claim 2**, Berthon-Jones teaches a mask wherein the first and second chambers have a closed perimeter (**See Figs. 5-6**).

7. **As to claim 3**, Berthon-Jones teaches a mask wherein the first and second chamber lie side by side (**See Figs. 5-6**).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
